I. ATTENDANCE

1. The fifty-seventh session of the Committee on Contributions was held at United Nations Headquarters from 27 May to 20 June 1997. The following members were present: Mr. Iqbal Akhund, Mr. Alvaro Gurgel de Alencar, Mr. Pieter Bierma, Mr. Uldis Blukis, Mr. Sergio Chaparro Ruiz, Mr. Evgueni N. Deineko, Mr. David Etuket, Mr. Neil Francis, Mr. Ihor V. Humenny, Mr. Ju Kuilin, Mr. Masao Kawai, Ms. Isabelle Klais, Mr. David A. Leis, Mr. Vanu G. Menon, Mr. Atilio N. Molteni, Mr. Mohamed Mahmoud Ould Cheikh El Ghaouth, Mr. Ugo Sessi and Mr. Omar Sirry.

2. The Committee observed a moment of silence in honour of the late Syed Amjad Ali, its former Chairman and member emeritus.

3. The Committee elected Mr. David Etuket Chairman and Mr. Ugo Sessi Vice-Chairman.

II. TERMS OF REFERENCE

4. The Committee conducted its work on the basis of its general mandate, as contained in rule 160 of the rules of procedure of the General Assembly; the original terms of reference of the Committee contained in chapter IX, section 2, paragraphs 13 and 14 of the report of the Preparatory Commission (PC/20) and in the report of the Fifth Committee (A/44), adopted during the first part of the first session of the General Assembly on 13 February 1946 (resolution 14 (I) A, para. 3); and the mandate contained in Assembly resolutions 46/221 C of 20 December 1991, 48/223 B and C of 23 December 1993, 49/19 A of 29 November 1994, 50/207 A of 23 December 1995, 50/207 B of 11 April 1996, 51/212 A of 18 December 1996 and 51/212 B of 3 April 1997.

5. The Committee had before it the summary records of the fifty-first session relating to agenda item 119, entitled "Scale of assessments for the apportionment of the expenses of the United Nations" (A/C.5/51/SR.3, 5-9, 44, 46, 51, 53 and 55); the relevant reports of the Fifth Committee to the General Assembly (A/48/806 and Add.1, A/49/673 and Add.1, A/50/843 and Add.1 and 2 and A/51/747 and Add.1); and the verbatim records of the 89th and 95th plenary meetings of the General Assembly at its fifty-first session (A/51/PV.89 and 95).

III. APPLICATION OF ARTICLE 19 OF THE CHARTER

A. Procedural aspects

6. The General Assembly, in its resolution 50/207 B, inter alia, requested the Committee on Contributions to review the procedural aspects of consideration of requests for exemption under Article 19 of the Charter and to convey its observations thereon to it not later than the end of the fifty-first session of the Assembly.

7. At its fifty-sixth session, the Committee had a general discussion on questions of procedure with respect to requests for permission to vote, under the provisions of Article 19. The Committee decided to continue its review of the question at its fifty-seventh session and to report to the General Assembly thereon before the end of the fifty-first session of the Assembly, as requested.

8. With regard to the existing procedures, the Committee recalled that, in accordance with the provisions of rule 160 of the rules of procedure of the General Assembly, the Committee advised the Assembly on the action to be taken with regard to the application of Article 19 of the Charter. In that connection, it reviewed requests referred to it by the Assembly or the President of the General Assembly from Member States falling under Article 19 for permission to vote in the Assembly. The Committee recalled that the Assembly had in the past also made a number of decisions concerning the application of Article 19 to specified Member States without referring the cases to the Committee. The Committee also recalled that the determination of which Member States fell under the provisions of Article 19 was made at the beginning of each year based on the gross assessments for the previous two calendar years and the amount of outstanding assessed contributions that were due and payable by the end of the previous year. The Committee noted that the Secretariat made the necessary calculations towards the end of each year and informed those Member States in danger of falling under Article 19 of the amounts of their outstanding assessed contributions and of the minimum payment necessary in order not to fall under the provisions of Article 19 during any meetings of the Assembly in the following year.

9. The Committee observed that Article 19 was applied from 1 January of each year and that the Committee did not normally meet until June. Accordingly, Member States requesting exemption under Article 19 were liable to the loss of their right to vote until action was taken by the Committee and the General Assembly, regardless of the outcome of their request. In the past, that had not been a serious problem since resumed and special sessions of the General Assembly had been relatively rare. That was clearly no longer true with regard to resumed sessions.

10. In that connection, the Committee recalled that, in its resolutions 50/207 B and 51/212 A, the General Assembly had approved exemptions under Article 19 for several Member States until the end of the fifty-first session of the Assembly. Consequently, the Committee could consider any requests from the Member States concerned for a further exemption under Article 19 before they lost their right to vote at the fifty-second session. The problem of timing, however, remained for Member States for which an exemption had not been granted earlier.

11. Suggestions for dealing with the problem of timing included automatic interim exemptions for Member States requesting such exemptions, pending action

by the Committee and the General Assembly; adjusting the period for calculation for application of Article 19 from the current calendar year to a period beginning closer to the annual sessions of the Committee; and holding special sessions of the Committee early in the year to review such requests. No general agreement was reached, however. Doubts were expressed about automatic interim exemptions under Article 19 for the reasons described in paragraph 8 above. Doubts were also expressed about changing the financial period for calculations for the application of Article 19, including whether such a change would be consistent with the Charter and the Financial Regulations and Rules of the United Nations. As regards the holding of special sessions early in the year to review requests for exemption under Article 19, the Committee recalled that it had been requested to hold such a session in 1996. The financial implications of such special sessions were noted, however, and doubt was expressed as to whether such meetings were always justified.

12. With regard to earlier notification of Member States in danger of falling under Article 19, requested in paragraph 12 of General Assembly resolution 50/207 B, the Committee was advised that uncertainty about the amounts and timing of assessments for peacekeeping and the international tribunals precluded accurate calculations for the application of Article 19 much before the end of the previous year.

13. Another concern discussed by the Committee was the need for better information when considering requests for exemption under Article 19. In that connection, the Committee urged that the fullest possible information be provided by the Member State concerned. In addition, the Committee would seek relevant information from the Secretariat.

14. The Committee discussed the possibility of the establishment of guidelines for the granting of exemptions under Article 19, including guidelines based on evidence that the Government of the Member State concerned had serious difficulties in obtaining revenues and in meeting its domestic and international financial obligations; and the importance of providing a payment plan by the Member State concerned. Doubt was expressed, however, as to whether one set of such guidelines could be applied uniformly to all those requesting exemptions under Article 19. The Committee agreed that the particular circumstances of each Member State concerned had to be considered when it reviewed such requests. In doing so, the Committee should draw on its review of other cases and endeavour to apply precedents as appropriate.

15. When considering requests for the extension of exemptions granted by the General Assembly, the Committee agreed that such requests should be fully reviewed on their own merits.

B. Representations from Member States

1. Liberia

16. The Committee had before it the text of a letter dated 5 June 1997 from the President of the General Assembly to the Chairman of the Committee transmitting a letter dated 4 June 1997 from the Permanent Representative of Liberia to the United Nations. It also heard an oral representation by the Permanent Representative of Liberia to the United Nations.

17. Liberia advised the Committee that the security situation in the country was now conducive to the conduct of free and fair elections in July and

August 1997 and that local market activity was developing. While that promised improvements in the economic situation of the country and the finances of the Government, the current situation still reflected the devastating impact of the protracted civil war on both. The principal source of government revenue was the maritime programme (ship registry), with an estimated annual income of $18 million. Against that, external debts had risen to approximately $2.6 billion and no payments were currently being made.

18. The Secretariat provided additional information in that respect and confirmed the serious economic problems facing the country and the limited impact of recent and prospective improvements on government finances.

19. The Committee agreed that the failure of Liberia to pay the amount necessary to avoid the application of Article 19 was due to conditions beyond its control. It, therefore, recommends to the General Assembly that Liberia be permitted to vote through the fifty-second session of the Assembly.

2. Tajikistan

20. The Committee had before it the text of a letter dated 3 June 1997 from the President of the General Assembly to the Chairman of the Committee transmitting a letter dated 2 June 1997 from the Permanent Representative of Tajikistan to the United Nations, as well as the text of a note verbale dated 2 June 1997 from the Permanent Mission of Tajikistan to the United Nations addressed to the Secretary-General. It also heard an oral representation by the Permanent Representative of Tajikistan.

21. Tajikistan made reference to the devastating impact of the civil war that it had suffered since its admission to the United Nations, as well as a series of natural disasters, including floods in 1992 and 1993 and heavy mudslides in 1995. In addition, the collapse of trade and economic relations among the republics of the former Soviet Union had also contributed to the decline of Tajikistan's gross domestic product (GDP). The collapse of agrarian and industrial output had caused a shortfall in the state budget and a fall in export earnings and foreign exchange reserves. As a result, foreign indebtedness had increased substantially and some debt re-scheduling had been necessary. While there were promising prospects for a political settlement and elections, the current situation made it necessary to request an extension of Tajikistan's exemption under Article 19.

22. The Committee noted that a peace agreement between the conflicting parties was due to be signed on 27 June 1997 and that revenue generation and collection of taxes were commencing. The economic problems of Tajikistan were still very serious, however. Taken together with the political situation, the impact on government revenues was severe and there was evidence of the Government's difficulty in meeting national and international payment obligations. The Committee noted the fact that Tajikistan was receiving significant international assistance, including a United Nations peacekeeping mission.

23. The Committee agreed that the failure of Tajikistan to pay the amount necessary to avoid the loss of its vote under Article 19 was due to conditions beyond its control, while noting with appreciation Tajikistan's payment of approximately $100,000 in April 1997. It, therefore, recommends to the General Assembly that Tajikistan be permitted to vote through the fifty-second session of the Assembly.

3. Comoros

24. The Committee had before it the text of a letter dated 20 June 1997 from the President of the General Assembly to the Chairman of the Committee transmitting a letter dated 17 June 1997 from the Chargé d'affaires a.i. of the Permanent Mission of the Comoros to the United Nations and the text of a letter dated 17 June 1997 from the Chargé d'affaires a.i. of the Permanent Mission of the Comoros to the United Nations addressed to the Chairman of the Committee.

25. The Comoros advised that the political, economic and social traumas occasioned by the mercenary invasion in 1995 had had a negative impact on the country's economy. The consequences of the invasion were still being felt and economic activity had still not returned to its former level. In addition, economic problems had contributed to an attempt at secession by one of the islands of the Comoros in March 1997.

26. Information provided by the Secretariat confirmed the continuing severe economic, social and political impact of the mercenary invasion and its aftermath. This compounded a deterioration in the terms of trade facing the Comoros for its major export crop.

27. The Committee agreed that the failure of the Comoros to pay the amount necessary to avoid the application of Article 19 was due to conditions beyond its control. It, therefore, recommends to the General Assembly that the Comoros be permitted to vote through the fifty-second session of the Assembly.

IV. SCALE OF ASSESSMENTS FOR THE PERIOD 1998-2000

A. Implementation of General Assembly resolution 51/212 B

28. In its resolution 51/212 B, the General Assembly, inter alia, requested the Committee to submit to the Assembly at its fifty-second session eight proposals for a scale of assessments for the period 1998-2000 based on elements and criteria outlined in paragraphs 1 (a) to 1 (h) of the resolution and to make appropriate recommendations thereon. It also decided that, notwithstanding the provisions of paragraph 1 of the resolution, the Member State that was the subject of Assembly decision 50/471 B of 23 December 1995 should not be subject to any increase in its rate of assessment for the period 1998-2000 as a result of the gradual phasing out of the scheme of limits during that period. Finally, it requested the Committee to keep a number of issues relating to the scale methodology under review.

29. In that connection, the Committee reviewed the eight proposals, which it designated proposals A to H, corresponding to the elements and criteria outlined in paragraphs 1 (a) to 1 (h) of General Assembly resolution 51/212 B. It also considered representations by a number of Member States and held an information meeting, as mandated by the Assembly in its resolution 46/221 C. In the light of the information provided and its mandate outlined in chapter II of the present report, the Committee reviewed the statistical information provided by the Secretariat. Based on adjusted income data up to 1995 for the various statistical base periods specified in resolution 51/212 B, the Committee then reviewed the eight proposals requested in the resolution and agreed that the tables, set out in annexes II to IX to the present report, accurately reflected the elements and criteria specified for proposals A to H. The Committee's observations, conclusions and recommendations with respect to the scale are reflected in chapter IV, section F, below.

B. Representations by Member States

30. Action by the Committee with respect to representations, information and supplementary data provided by Member States, as reflected in chapter IV, sections B and C, is indicated under chapter IV, section D, below, except for Liechtenstein and Yugoslavia (see paras. 34 and 35 below).

31. The Committee had before it written representations from Cuba, the Democratic People's Republic of Korea, Liechtenstein and Yugoslavia.

32. In its representation, Cuba transmitted information on gross national income, GDP, implicit GDP deflators and outstanding external debt for the period 1989-1995, based on an exchange rate of one United States dollar to one Cuban peso. In addition, information is provided on the serious problems facing the Cuban economy resulting from the severance of economic relations with the former Soviet Union and the countries of Eastern Europe, which were Cuba's main trading partners; the effects of the almost 40-year economic, commercial and financial blockade of Cuba; problems affecting its principal exports, especially cane sugar; and natural disasters, including hurricanes and tropical storms and infestation by a new agricultural pest.

33. In its representation, the Democratic People's Republic of Korea transmitted information on the gross national product (GNP), national income, population and exchange rates for the period 1988-1995. In addition,

information was provided on the serious economic problems facing the economy of the Democratic People's Republic of Korea resulting from the collapse of trade with the countries of Eastern Europe and a shift to hard currency foreign trade, with a consequent reduction in trade volumes; serious flood damage with a consequent impact on agricultural and industrial production; and a consequent need for imports of food and other essential products. As a result, the per capita GNP had fallen from $911 in 1989 to $239 in 1995 and the Democratic People's Republic of Korea had appealed for humanitarian assistance for the first time.

34. In its representation, Liechtenstein informed the Committee of its Government's wish to maintain its current level of assessment of 0.01 per cent of the United Nations regular budget and peacekeeping budgets for the period 1998-2000. Some members felt that it was not a prerogative of Member States to fix their assessment rate at an arbitrary level. Others recalled that the Committee had considered voluntary increases in the assessment rates of particular Member States in the past. The Committee took note of that request and decided to draw it to the attention of the General Assembly.

35. In its representation, Yugoslavia drew attention to the severe impact that sanctions had had on its economy. Despite some improvement since the lifting of sanctions, unemployment was still high and the social situation very difficult. These problems were compounded by the presence of a large number of refugees. In the circumstances, Yugoslavia questioned whether the current rate of assessment, 0.10 per cent, adequately reflected its situation and capacity to pay. The Committee took note of the representation.

C. Information meeting for Member States

36. Pursuant to paragraph 1 of General Assembly resolution 46/221 C, the Committee met with representatives of Cuba, the Democratic People's Republic of Korea and the Marshall Islands, speaking on behalf of the Marshall Islands, Fiji, Micronesia (Federated States of), Nepal, Palau, Papua New Guinea, Samoa, Solomon Islands and Vanuatu.

37. The representative of Cuba provided additional information regarding 1987-1988 and the representative of the Democratic People's Republic of Korea provided further information for 1987. Members of the Committee sought clarification of points raised in the written and oral representations of those Member States and supplementary information was subsequently also provided in writing to questions raised.

38. The representative of the Marshall Islands, on behalf of the delegations listed in paragraph 36, emphasized in his oral representation the inequity of the current floor assessment rate of 0.01 per cent. In that connection, he indicated his willingness to accept the recommendation of the Committee for a reduction of the floor to 0.001 per cent, while being flexible on the issue of abolition of the floor rate. He stressed that the option of the status quo was not acceptable to the delegations for whom he was speaking.

D. Statistical information

39. The Committee had before it for the period 1987-1995 a comprehensive database for all Member States and participating non-Member States on various measures of income in local currencies, population, exchange rates and total

external debt stocks, repayments of principal and total and per capita income measures in United States dollars. The primary source for income data in local currencies was the national accounts questionnaire sent by the United Nations to the countries concerned. For those countries for which full replies to the questionnaire were not received, estimates were prepared by the Statistics Division of the Secretariat based on information from other national and international sources, notably the International Monetary Fund (IMF) and the World Bank.

40. In reviewing the statistical information provided, the Committee paid due attention to the data provided in the representations outlined above and at the information meeting. It also reviewed the data for selected countries whose data had been adjusted in the context of preparation of the scale of assessments for the period 1995-1997, or whose results, in United States dollars, suggested that there might be anomalies or distortions in the data. Subject to a limited number of cases outlined below, the Committee accepted the data presented without change. In all cases, the Committee was guided by the mandate given in General Assembly resolution 48/223 C to base the scale on reliable, verifiable and comparable data. In this connection, the Committee optimized the reliability of data by using the most recent figures available and assured the identity of data, unless more reliable data were available, for the years that overlap within the statistical base periods of the current and the 1998-2000 scales for proposals with base periods of six years or longer.

1. Population

41. The population estimates are generally drawn from the revised World Population Prospects, 1996, published by the Population Division of the Secretariat and are supplemented, as required, by national estimates for countries and areas not included.

2. External debt

42. Information on total external debt ("debt stock") and repayments of principal ("debt flow") were extracted from the World Bank database on external debt, now published in the World Bank series, Global Development Finance. In these tables, the World Bank includes countries with a per capita GNP of up to $9,385.

43. Total debt stocks include public and publicly guaranteed long-term debt, private non-guaranteed long-term debt, the use of IMF credit and short-term debt. Principal repayments are part of total debt flows, which also include disbursements, net flows and transfers on debt and interest payments and consist of the amounts of principal paid in foreign currency, goods or services in the year specified.

44. Supplementary information on debt stock was also provided by Cuba and the Democratic People's Republic of Korea and was considered by the Committee in the course of its deliberations.

3. Gross national product/national income

45. The Committee accepted the local currency data provided by the Statistics Division, except for Cuba and the Democratic People's Republic of Korea.

46. In the case of Cuba, the Committee decided to use the revised data supplied by that country. It was noted that the initial data provided by the United Nations included estimates based on partial replies to the national accounts questionnaire and that the figures provided were reasonably consistent with the initial data.

47. In the case of the Democratic People's Republic of Korea, the Committee noted that the data provided by the Statistics Division were based on estimates from an unofficial source and that it was the first time that the Democratic People's Republic of Korea had provided official statistics for that purpose. While welcoming that development, the Committee stressed the importance of Member States providing full responses to the national accounts questionnaire in a timely fashion so as to ensure accurate and comparable data as a basis for its recommendations. The Committee nevertheless agreed to use the figures provided by the Democratic People's Republic of Korea as they appeared realistic and more soundly based than the unofficial estimates provided by the Statistics Division.

4. Exchange rates

48. For conversion of local currency data to United States dollars, period averages of market exchange rates communicated to IMF by national monetary authorities, agreed to by the Fund and published in International Financial Statistics, were used whenever available. It may be recalled that, as indicated in the Committee's report on its fifty-sixth session,[1] the publication includes three types of rates, which are referred to as market exchange rates for purposes of the scale: (a) market rates, determined largely by market forces; (b) official rates, determined by government authorities; and (c) principal rates, for countries maintaining multiple exchange rate arrangements. Where market exchange rates were not available in International Financial Statistics or from the IMF Economic Information System, United Nations operational rates of exchange were generally used.

49. In considering the question of the possible adjustment of exchange rates in cases of excessive fluctuations or distortions in the income of certain Member States, the Committee was guided by the criteria set out in paragraphs 1 (a) to 1 (h) of General Assembly resolution 51/212 B. In reviewing possible cases of such distortions, the Committee recalled that it had approved the application of special conversion rates for 33 Member States in the context of preparing the scale of assessments for the period 1995-1997.[2] The Committee reviewed the situation of those countries, as well as those evidencing abnormally large year-to-year changes in income levels in United States dollars. However, situations where market exchange rates were influenced by interventions by Governments in the markets that nevertheless did not result in excessive distortions were not corrected by the Committee.

50. In order to provide more reliable, verifiable and comparable data, the Committee decided to use the special conversion rates approved for the 1995-1997 scale for those proposals using a base period including years prior to 1993. Where improved data was now available, it was used in calculating price-adjusted rates of exchange (PARE). Such calculations, however, use the same base period for PARE calculations.

51. Following its review, the Committee decided to retain the exchange rates for the period 1993-1995 in the Statistics Division's database except as outlined below.

Afghanistan

52. The Committee noted that the exchange rate used in the database did not vary at all during the period 1987-1995 and that the resulting level of income in United States dollars appeared to increase at an unrealistically high rate, especially bearing in mind the circumstances in the country. The Committee decided to apply PARE to achieve a more realistic result.

Cuba

53. Based on the information provided by the Government of Cuba, which is not a member of IMF, the Committee decided to use an exchange rate of one Cuban peso per United States dollar, as this was the main rate used for trade purposes.

Democratic People's Republic of Korea

54. The Committee decided to use the exchange rate figures provided by the Government of the Democratic People's Republic of Korea, which was also not a member of IMF.

Iraq

55. The Committee noted that the exchange rate used in the database did not vary at all during the period 1987-1995 and that the resulting level of income in United States dollars appeared to increase at an unrealistically high rate. The Committee decided to apply PARE to achieve a more realistic result.

Myanmar

56. The Committee noted that there was a relatively stable official exchange rate, not reflecting domestic inflation, and that the resulting level of income in United States dollars appeared to increase at an unrealistically high rate. It decided to apply PARE.

Suriname

57. The Committee recalled the representation of Suriname, addressed to the President of the General Assembly in July 1996, forwarded to the Chairman of the Committee and considered by the members of the Committee before the beginning of the fifty-seventh session. This related to a sharp change in the exchange rate of Suriname in 1994. The Committee agreed that the unchanged rate from 1987-1993, followed by a sharp change in 1994, cast doubt on the reliability of the official rate used and decided to apply PARE.

E. Proposals outlined in paragraphs 1 (a) to 1 (h) of General Assembly resolution 51/212 B

58. In reviewing proposals A to H, as outlined in paragraphs 1 (a) to 1 (h) of General Assembly resolution 51/212 B, the Committee used as a basis for its work the table presented in annex I, reflecting the elements of the methodology as they appear respectively in the eight proposals.

59. In examining the eight proposals described in annex I, the Committee noted that, in order to prepare the corresponding machine scales, some proposals would require further assumptions to be made in regard to conversion rates and the gradual phase-out of the effects of the scheme of limits.

60. With regard to conversion rates, the Committee noted that proposal A had a complete methodology for the calculation of these rates and the other seven proposals offered criteria for establishing such methodologies. Upon examination of the criteria contained in the proposals, the Committee concluded that the criteria in paragraph 3 (b) of resolution 46/221 B and in paragraph 38 of the report of the Committee on its fiftieth session[3] were mutually consistent. In regard to proposal A, the Committee was informed by a representative of IMF that at least some of the special conversion rates used in the 1995-1997 scale (cf. para. 49) could not be supplied for the years 1993-1995. In these circumstances, the Committee concluded that it would be most efficient to apply to all eight proposals the more detailed criteria in paragraph 3 (b) of resolution 46/221 B. The resulting exchange rates, described in section D.4 above, were used for all eight proposals.

61. With regard to the scheme of limits to be applied in the machine scale for option A, the Committee assumed that it was intended that that proposal would phase out the scheme of limits fully during the period 1998-2000 in accordance with the provisions of General Assembly resolution 48/223 B. As for options C and H, the Committee noted that they were not explicit about the possible options of the gradual phase-out of the effect of the scheme. In that regard, the Committee considered only two possibilities (accelerated phase-out in the second year of the scale and phase-out in equal steps over three years) as both options had been given serious attention by the Committee. For proposals C and H, the Committee decided to use the same accelerated phase-out as in the current scale.

62. The Committee further noted that paragraph 2 of resolution 51/212 B provides that the Member State which is the subject of General Assembly decision 50/471 B should not be subject to any increase in its rate of assessment for the period 1998-2000 as a result of the gradual phasing out of the scheme of limits. Since proposals D, F and G involve immediate, rather than gradual, phasing out of the scheme of limits, the Committee has therefore assumed that paragraph 2 of the resolution would not apply to those three proposals.

1. Proposal A

63. The proposal is based on the methodology used for the scale of assessments for 1995-1997, as shown in the table. The machine scale, as contained in annex II, includes four decimal places in the second year of the scale period as does the scale of assessments for the period 1995-1997.

2. Proposal B

64. The machine scale for proposal B is attached as annex III.

3. Proposal C

65. The machine scale for proposal C is shown in annex IV.

4. Proposal D

66. Proposal D provides for automatic annual updating of the scale. As this can only be done each year as new data become available, the scale figures in the machine scale in annex V would only apply to 1998.

5. Proposal E

67. The machine scale for proposal E is attached as annex VI. While the proposal was not specific on the point, based on its provision for a minimum assessment rate of 0.001 per cent, three decimal places were used.

6. Proposal F

68. Proposal F provides for automatic annual recalculation of the scale. As this can only be done each year as new data become available, the scale figures in the machine scale in annex VII would only apply to 1998.

7. Proposal G

69. Proposal G would introduce a positive gradient of 25 per cent above the threshold to allocate the points redistributed from those countries below it. The machine scale for proposal G is shown in annex VIII.

8. Proposal H

70. With respect to the application of the 10-year delay in applying the surtax for countries moving up through the threshold for the low per capita income allowance, the Committee has assumed that this provision is to be applied beginning in the 1998-2000 scale period and thereafter. The machine scale for proposal H is shown in annex IX.

F. Conclusions and recommendations concerning the scale methodology

71. In its resolution 51/212 B, the General Assembly requested the Committee on Contributions to make appropriate recommendations on the eight proposals outlined in paragraphs 1 (a) to 1 (h) of the resolution. It also requested the Committee to keep a number of issues relating to the scale methodology under review. In this connection, the Committee recalled and reaffirmed its recommendations on a number of elements of the scale methodology, as contained in its report on its fifty-sixth session.[3] Consistent with its mandates, the Committee decided to resume its review of those elements of the scale methodology on which it could not reach agreement at its previous sessions, with a view, if possible, to permitting the Committee to advance a ninth proposal, reflecting a consensus on all the major elements of the scale.

72. In this connection, the Committee reached tentative agreement on several elements of the scale, namely the base period, the debt burden adjustment and the scheme of limits. It must be stressed that final agreement on a ninth scale proposal was contingent on agreement on each of its elements. In the end, such an agreement did not prove possible. The Committee nevertheless believes that

the tentative progress made on some of the outstanding issues could be helpful to the General Assembly in deciding on the approach to be taken for the scale of assessments for the period 1998-2000.

1. Income measures

73. The Committee was briefed by the Statistics Division of the United Nations on progress in the implementation of the 1993 system of national accounts. In this connection, the Committee was informed of action taken by the Task Force on National Accounts, convened by the Inter-Secretariat Working Group on National Accounts, and the review of progress by the Statistical Commission. The Working Group had elaborated milestones for the implementation of the 1993 SNA, which had been endorsed by the Statistical Commission. Assistance to Member States in this process has included subregional and regional workshops and training seminars, pilot projects and the appointment of an Interregional Adviser on Macro Accounting for Policy Analysis in the Statistics Division. The aim of these activities was to assist countries in formulating and implementing their own medium-term strategies for development of the system of national accounts. The seminars contributed to the creation of a subregional infrastructure of communication. The implementation of the 1993 system of national accounts was not considered to pose a problem from the point of view of data comparability for the purposes of the next scale of assessments, but would be kept very much under review for the following scale period.

74. The Committee recalled and reaffirmed its earlier recommendation[4] that future scales should be based on estimates of GNP.

2. Base period

75. In the context of trying to elaborate a ninth proposal, the Committee reached a tentative agreement that the next scale should have a base period of six years. It was felt that this shortening of the current base period was a reasonable compromise between arguments in favour of a longer period and those in favour of a shorter one. It also took account of the desirability of effecting changes in elements of the scale methodology gradually as well as the significant shifts in the shares of Member States already caused by new data and the further phasing out of the scheme of limits. It was also agreed that the issue of a possible further reduction of the base period to three years should be examined in the context of the scale for the period 2001-2003.

3. Conversion rates

76. The Committee met with representatives of IMF and the World Bank and was briefed on the approach taken by those organizations with respect to exchange rates, especially in cases where market rates were not available and where excessive fluctuations and distortions complicated international comparisons.

77. For the purposes of the next scale, the Committee reaffirmed its conclusion[5] that market exchange rates, as described in section IV.D.4 above, should be used, except where this caused excessive fluctuations or distortions in the income of some Member States, when PAREs or other appropriate conversion rates should be employed.

78. A number of members expressed interest in the World Bank method of adjusting exchange rates for purposes of comparison. The Committee agreed to keep under review the issue of conversion rates in its future sessions, especially where market exchange rates are unavailable or inappropriate, including the methodology for calculation of PAREs and the alternative World Bank method.

4. Debt-burden adjustment

79. The Committee recalled and reaffirmed its recommendation[6] that, should the General Assembly decide to retain this element of the scale methodology, the adjustment should be based on data on actual principal repayments.

80. In the context of attempting to elaborate a ninth proposal, the Committee tentatively agreed that the adjustment should be maintained.

5. Low per capita income adjustment

81. The Committee had an extended discussion of the low per capita income adjustment in the context of attempting to elaborate a ninth proposal.

82. In that connection, the Committee reaffirmed the continuing relevance and importance of the principle of a low per capita income adjustment.

83. The Committee noted that that adjustment was the largest effected under the current methodology. Some members felt that a gradient of 85 per cent resulted in some cases in an excessively high adjustment of comparative national incomes for the purposes of the scale and therefore deemed it necessary that the effect of the adjustment should be substantially reduced. In that connection, as a first step to that end, some members proposed a reduction of the gradient to 75 per cent. Some members stressed that, in order to arrive at a balanced ninth proposal, a reduction of the gradient as proposed was necessary for a final agreement with a base period of six, rather than three, years and a gradual, rather than immediate, phase-out of the scheme of limits.

84. Some members stressed that the low per capita income adjustment had been reaffirmed by the General Assembly as a fundamental element reflecting the principle of capacity to pay and had been in use since 1946. They stressed that the parameters of the current formula, as it had evolved through the years, met the need of countries with low per capita income and best reflected the capacity to pay of Member States and therefore required no further change.

85. Accordingly, the Committee was unable to agree on the appropriate level for the gradient.

86. With regard to the problem of discontinuity experienced by countries moving up through the low per capita income threshold between scale periods, the Committee considered a number of suggestions. These included the application of progressivity in distributing points above the threshold and a return to the pre-1979 methodology for the low per capita income adjustment as a temporary measure for the next scale. There was also some discussion of the rationale for fixing the low per capita income threshold at the level of average world income.

87. The Committee also considered the suggestion that permanent members of the Security Council should be ineligible for relief under the low per capita income

adjustment. In this connection, some members expanded on the discussion at the Committee's fifty-sixth session[7] of a "responsibility to pay" for Member States that have special political responsibilities. In this connection, they also stressed their opinion that those Member States should not be eligible for relief under the low per capita income adjustment, especially in the light of the very low rate of assessment of a few of those Member States in the future scale. Some members stressed that it was totally contrary to the principle of capacity to pay and the Charter of the United Nations. Some members cited the historical facts determining the membership of the Security Council and argued that the question was purely political and it was not in the mandate of the Committee on Contributions to discuss the matter. Some members recalled that the original terms of reference of the Committee, as approved by the General Assembly in paragraph 3 of its resolution 14 (I) A, specified that the expenses of the United Nations should be apportioned broadly according to capacity to pay, and that in subsequent resolutions the Assembly had reaffirmed capacity to pay as the fundamental criterion for the apportionment of the expenses of the Organization. Some members argued that the question was purely political and that, since there was no technical justification for making such an exception within the context of the principle of the capacity to pay, it was not within the mandate of the Committee on Contributions to discuss the matter. Other members added that the issue did not fall under the low per capita income adjustment and, since an adjustment for special responsibilities was not on the agenda, they did not feel that there was a basis for the discussion.

88. The Committee concluded that further study of issues relating to the low per capita income adjustment was needed and agreed to undertake a comprehensive review at its next session.

6. Floor

89. The Committee recalled and reaffirmed its recommendation[8] that, in future scales of assessments, all Member States whose share of adjusted world income was less than the current floor of 0.01 per cent should be assessed at their actual share of adjusted income, subject to a minimum assessment rate of 0.001 per cent.

7. Ceilings

90. The Committee recalled that its terms of reference specified that, if a ceiling was imposed on contributions, it should not be such as seriously to obscure the relation between a nation's contribution and its capacity to pay.

91. With regard to the proposal for lowering the ceiling, some members noted that the ceiling would be applied to two Member States, which would raise an issue of equity for both States.

92. Some members recalled the discussion at the fifty-sixth session of the Committee[7] of a suggested "responsibility to pay" for those Member States with special political responsibilities. Others recalled their disagreement with the suggestion and considered that it fell outside the terms of reference of the Committee.

93. The Committee recalled that, in its resolution 48/223 B of 23 December 1993, the General Assembly had decided that individual assessment rates for the least developed countries should not exceed their current level of

0.01 per cent. The Committee therefore believed that that should be an element of the next scale.

8. Scheme of limits

94. The Committee recalled that, as mandated by the General Assembly in its resolution 48/223 B, the complete phase-out of the scheme of limits would be undertaken in connection with the adoption of the next scale. In that connection, and in the context of trying to elaborate a ninth proposal, the Committee tentatively agreed that the scheme should be phased out gradually over the scale period, with an accelerated phase-out in the second year, as in the current scale. In regard to the 15 per cent limitation on the allocation of additional points to developing countries benefiting from its application, it is the Committee's understanding that this would apply to developing countries whose assessment rate would rise in 1998-2000 as a result of the further phase-out of the scheme of limits and which benefited from the scheme under the current scale.

9. Rounding

95. The Committee recalled and reaffirmed its recommendation[9] that the scale of assessments should be carried to three decimal places.

10. Annual recalculation

96. The Committee noted that there were technical problems in implementing an agreed gradual phase-out of the scheme of limits together with annual recalculation of the scale, since the data used for calculating the gradual phase-out would change each year.

97. Members had differing views on the merits of annual recalculation. Some stressed the advantages of using the most recent data and thus most closely approximating actual capacity to pay. Others questioned the utility of the approach, doubting that the exercise would in fact be automatic and citing the danger of greater instability, as the negotiation of the scale would become an annual exercise. The Committee agreed that it should examine annual recalculation further at its next session.

V. ASSESSMENT OF NON-MEMBER STATES

98. The Committee recalled that, by its resolution 44/197 B of 21 December 1989, the General Assembly had endorsed revised assessment procedures for non-member States. These provide for assessment of contributions on the basis of a flat annual fee, which is calculated for each non-member State on the basis of its past level of participation in United Nations activities. The flat annual fee is then applied to the applicable assessment base, which equals the total net assessment for the United Nations regular budget for the year, adjusted for tax refunds. The flat annual fee rates in effect are:

Non-member State	Flat annual fee as proportion of assessment rate (percentage)
Holy See	10
Nauru	1
Switzerland	30
Tonga	5

99. In establishing the rates of assessment that form the basis for the calculation of the flat annual fees, the Committee has applied the same methodology as for Member States. The rates that would apply under proposals A to H, outlined in section IV above, will be as follows:

		Proposal						
	1997 rate	A	B and C	D	E	F	G	H
Holy See	0.01	0.01	0.001	0.001	0.001	0.001	0.0001	0.001
Nauru	0.01	0.01	0.001	0.001	0.001	0.001	0.0015	0.001
Switzerland	1.21	1.25	1.226	1.157	1.171	1.194	1.2505	1.216
Tonga	0.01	0.01	0.001	0.001	0.001	0.001	0.0003	0.001

VI. OTHER MATTERS

A. Collection of contributions

100. The Committee noted that, at the conclusion of the current session, the following 17 Members were in arrears in the payment of their assessed contributions to the expenses of the United Nations under the terms of Article 19 of the Charter of the United Nations and had no vote in the General Assembly: Bosnia and Herzegovina, Central African Republic, Chad, Congo (Republic of), Dominica, Equatorial Guinea, Gambia, Grenada, Guinea-Bissau, Iraq, Kyrgyzstan, Republic of Moldova, Sao Tome and Principe, Seychelles, Somalia, Togo and Yugoslavia. The Committee also noted that the following four Members were in arrears in the payment of their assessed contributions under the terms of Article 19, but had been permitted to vote in the General Assembly through the fifty-first session pursuant to the provisions of General Assembly resolutions 50/207 B and 51/212 A: Comoros, Liberia, Rwanda and Tajikistan. The Committee decided to authorize its Chairman to issue an addendum to the present report, if necessary.

B. Payment of contributions in currencies other than United States dollars

101. Under the provisions of paragraph 3 (a) of its resolution 49/19 B of 23 December 1994, the General Assembly empowered the Secretary-General to accept, at his discretion and after consultation with the Chairman of the Committee on Contributions, a portion of the contributions of Member States for the calendar years 1995, 1996 and 1997 in currencies other than United States dollars.

102. The Committee noted that 11 Member States had availed themselves of the opportunity of paying the equivalent of $3.5 million in 11 non-United States dollar currencies acceptable to the Organization in 1996.

C. Date of next session

103. The Committee decided to hold its fifty-eighth session in New York from 8 to 26 June 1998.

[a] The average world per capita national income for the base period average 1989-1995 and 1988-1995 is $3,674.

[b] Least developed country (LDC).

[c] Subject to LDC maximum rate adjustment.

[d] Country eligible for the 15 per cent provision with respect to the phasing out of the scheme of limits. Points distributed as a result of the 15 per cent provision: 0.754.

B. Point differences resulting from step-by-step adjustments to the scale of assessments methodology based on proposal A of resolution 51/212 B

[a] The average world per capita gross national product for the base period 1990-1995 is $4,313.

[b] Least developed country (LDC).

[c] Country eligible for the 15 per cent provision with respect to the phasing out of the scheme of limits. Points distributed as a result of the 15 per cent provision: 0.730.

B. Point differences resulting from step-by-step adjustments to the scale of assessments methodology based on proposal B of resolution 51/212 B

[a] The average world per capita gross national product for the base period 1993-1995 is $4,520.

[b] Least developed country (LDC).

[c] Countries eligible for the 15 per cent provision with respect to the phasing out of the scheme of limits. Points distributed as a result of the 15 per cent provision: 1.125.

B. Point differences resulting from step-by-step adjustments to the scale of assessments methodology based on proposal D of resolution 51/212 B

[a] The average world per capita gross national product for the base period 1990-1995 is $4,318.

[b] Least developed country (LDC).

[c] Countries eligible for the 15 per cent provision with respect to the phasing out of the scheme of limits. Points distributed as a result of the 15 per cent provision: 0.704.

B. Point differences resulting from step-by-step adjustments to the scale of assessments methodology based on proposal E of resolution 51/212 B

[a] The average world per capita gross national product for the base period 1987-1995 is $4,050.

[b] Least developed country (LDC).

[c] Subject to delay for passing the threshold of the low per capita income adjustment.

[d] Countries eligible for the 15 per cent provision with respect to the phasing out of the scheme of limits. Points distributed as a result of the 15 per cent provision: 0.552.

B. Point differences resulting from step-by-step adjustments to the scale of assessments methodology based on proposal H of resolution 51/212 B
